

GEORGIA.

NEWS GATHERED FROM ALL OVER THE STATE.

Politics and Politics of the Georgia Country—Murder at Ty Ty—Milledgeville Session—Commencement at Oxford—Wheat and Mail in Heard County—Valdosta Demos.

Special Correspondence of The Constitution.

ALBANY, June 16.—The most "retired" politician in the state just now is the Hon. William E. Smith, of Albany. Though he served his district for three successive terms in congress, and very narrowly escaped having to do so the fourth, no man in the world has less the look of an anxious or expectant—still less, a disappointed—politician. He is one of those few rare men whose success, political or otherwise, is always attended with the least amount of heart-burning jealousy and pique suppressed envy. Just now he is far more intent in developing the resources of two large and flourishing sugar plantations in Louisiana than nursing schemes of future political advancement. If he has any such, they are unknown to his intimates, and are certainly unknown to the writer. While the late press, and the politicians generally, appear to be engaged in laborious search for a congressman-at-large, the suggestion of a name which would command a larger following than any other in all southwest Georgia, might not be ill-timed. The large population vote he always received in this (second) largely republican district, since he first defeated Richard H. Whitley in 1874, sufficiently attests this fact. At least, he is looked upon as well nigh invincible. As his record in Congress is familiar to all Georgians, more particularly the portion of it in connection with the electoral commission bill, which he differed from all his colleagues from Georgia by a persistent opposition to its passage, it is needless to refer to it except at large. Unostentatious and retiring in disposition exceedingly popular in manner and possessed withal of a remarkably clear perception and insight into men and things, very few men in Georgia would fill the office more acceptably. Political speculations are always uncertain and generally futile, but when one's prognostics coincide with those of a number of others they may be worth at least a passing mention. It may be stated here, as the sum of those indulged in around here, that the Hon. H. W. Turner will have no serious opposition to a re-election to congress. In addition to his excellent record thus far and an unblemished personal character, he has the prestige of established usage. The tendency of a re-nomination, where deserved, in his favor. No one has yet mentioned as likely to oppose his claims before the convention. It must not be supposed, however, that he will meet with no opposition at all. It is already evident that an independent or republican opponent, though not probably both together, will have to be encountered. The signs are abundant even now, that a thorough re-nomination of the republican party in this strong republican district will be effected. Who the probable candidate may be, it is too early to conjecture, but whoever it is, he will have to stand independent, he will enter the lists with a strong backing and support. Mr. Turner's election before, even with a badly organized and demoralized party in opposition, was a surprise to many of his supporters. In the event even of a close contest at the polls this time, the final result, before a republican and strongly partisan house of representatives, could scarcely be called doubtful—matter it would be well to take into consideration. Altogether, the situation is not free from serious difficulties to the democracy of the second district. The district no, it must be confessed, has rather an unsavory reputation in republican estimation abroad. Several years ago, it will be recalled, one Democratic Senator (Cox) was elected by a large majority in this district. Tift, with apparently a large numerical majority in his favor, failed to get his seat over his republican contestant, Whitley.

Two names have so far been suggested, or have come forward for the minor state offices. Dougherty loses one of her two representatives under the late apportionment. This fact will be likely to concentrate more votes on the next legislative race. Heretofore by an understood arrangement, the democratic and republican nominees have with no other object in view, the principle of a fair and equal division of the offices. As such an arrangement can no longer be effected, it is quite likely that a republican will be returned to the house from Dougherty. No serious contest is expected for the senate. The large increase in her voting population, within the past two years will make Worth county a more important factor in deciding the contest than heretofore, and it is not unlikely the candidate will come from Worth.

Yesterday M. J. T. Maund, the publisher of the "Ty Ty Echo," was brought to Albany under a charge of being concerned in the murder of an unknown man named Buchanan, which occurred on Wednesday evening, in March or April last. It appears that a dance was being given at the house of Maund's father in the town, and Buchanan, who was looked upon as a sort of tramp, but who had taken a seat on a stump in the street outside, to listen to the music. When the dance broke up he was noticed and spoken to by a number of the guests as they came out of the house. Next morning his dead body was found near the spot with a bullet hole through it. Suspicion fell at once on several, including T. Maund in the number, and five, with Maund, were arrested and had a court-martial trial, but were discharged. This did not allay the suspicion, however, which had fastened on Maund, and his arrest was made yesterday by officers from this county, on facts that appeared to them to justify it. What the precise nature of the facts and the proofs against him are, we are not apprised. He is quite a young man, a prior to this he was the owner of the Ty Ty Echo, of which Mr. Thompson is the editor, and was raised about Dawson, Ga. A few weeks ago he figured as the hero of a runaway match, his father, being an interesting young lady, the daughter of a prominent citizen of Ty Ty.

A petition is being circulated and numerous signed by citizens of Dougherty calling upon the county commissioners to withhold the granting of licenses in the future to any more of the numerous deadfalls in the shape of low doggeries scattered about rough the county. The reasons on which this petition is based are too obvious to require comment, and are quite as applicable to those about town as to those in the country. Why any of them are "protected" by law has long been a standing mystery.

R. M. Johnson, the slayer of John Cooper, has been admitted to bail by Judge Warren in the sum of \$2,000 on the warrant against him with murder, and in the sum of \$1,000 on the one charging an assault with an intent to kill, made on John Cooper.

Albany is now in the midst of her commencement exercises of the closing exercises of Mrs. H. A. Collier's school last evening were quite interesting. Likewise those of Mrs. M. A. Thornburg's large school at Ty Ty hall on Thursday night. The latter the calisthenic exercises of the kindergarten department in particular were much admired. The exercises of Mrs. A. Starnes's popular school came off on Tuesday and Wednesday evenings last, and were very entertaining. Some of her pupils showed remarkable proficiency. Albany has reason to be proud of her private schools. The past three days have been rainless but the weather is exceeding sultry.

One fact which I omitted to mention in my report of the proceedings of the Albany board of trade meeting on Wednesday evening last, was that a special committee was appointed, after some discussion, to confer with the authorities representing the "Green line" with a view to making Albany a terminal and distributing point for freight from the western cities. Much was said in favor of

Albany as a distributing center, in view of the number of radiating trunk and branch railroads, centering here, and it was thought that if the advantages of Albany were properly presented, the green line agents would see the propriety and benefit of recognizing Albany as the only proper distributing center of southwest Georgia. A committee was appointed, of which the Hon. A. C. Westbrook was chairman, to correspond with the lines interested in the matter, and draw their special attention to Albany. It will be seen from this, and what I have written heretofore, that the Albany board of trade have cut out for themselves a good amount of work for the summer, which, if carried in effect, will not fail to redound to the material benefit of Albany in the near future. J. A.

MILLEDGEVILLE MATTERS.

Special Correspondence of The Constitution.

MILLEDGEVILLE, June 19.—Mr. W. H. Barnes, of California, is visiting his father's family at Scottsboro, four and a half miles from our city. He made an address to our city Sabbath-schools yesterday, and his lecture, for the benefit of the building committee of our Presbyterian church, was a well merited success. Major L. H. McIntosh, ordnance officer of the state troops during the war, but more recently of Philadelphia, has been here some days visiting his old friends. Miss Foreman, of Norfolk, Virginia, is visiting the family of Judge J. B. Sanford. Revs. J. M. Stoney, of the Episcopal, and D. McQueen, of the Presbyterian church, are off on a summer tour, and there are no services at their churches now. The small grain crops are nearly threshed, and the yield is simply enormous, particularly of oats. The yield of corn is also very good, but it is true, new crops are not so good as last year's. The twenty acres of oats sown, one acre each by twenty contestants for a prize, will yield 1,500 to 1,800 bushels. The Dallas wheat is ahead of all its competitors in freedom from rust and yield per acre. Our corn crop is as good as the last and is generally in good condition. The continuous rains for the last few weeks are making the fight with General Green of doubtful issue, and King Cotton is in danger of being smothered.

BEAR HUNTING AND FARMING.

Special Correspondence of The Constitution.

ALBANY, June 19.—Colonel C. B. Wooten, son of Colonel C. B. Wooten, states that he has ten acres of cotton that will average high yield, and has a quantity of well-matured cotton on hand, which is sent you today. Colonel Wooten is a good farmer and a fine lawyer. The corn crops in this section are as fine as the land can produce, and the cotton crop that was so lousy a few weeks ago has come out and is growing very finely. Our farmers are all in fine spirits. Our section hasn't suffered for rain a day this season. Captain P. E. Boyd and some others went out bear hunting yesterday, jumped two very soon, but they failed to go to the right hand, but ran through the Captain's cotton field, which he did not appreciate very much. He says upon the whole he thinks it will prove fun, especially when red bugs are so plentiful. Captain Boyd has several thousand acres in cultivation this year. He is the best farmer in southwest Georgia as to acreage. He reports that his oat and corn crops were never better in his life. Everything in the way of fertilizers has paid this year. He has over one hundred tons of guano. Captain Boyd has one field on the noted plantation owned by the Hon. B. H. Hill, known as "Beach Grove," with nine hundred acres of high yield. He said to-night that he had cotton with as high as ten grown bolls to the stalk. Dear Editors: When you see any one who wants to buy the finest farm lands in the world, send them to southwest Georgia.

COMMENCEMENT AT OXFORD.

Special Correspondence of The Constitution.

OXFORD, June 16.—The many warm friends and visitors of this institution much enjoyed today, the fourteenth return of commencement. The exercises of the forenoon consisted of orations by the literary societies. They did credit to the young men and honor to the societies. The annual address before the societies was given by the Hon. W. J. Sanford, of Opelika. The people of Alabama know well the character of an address by this distinguished gentleman. His address was a model of eloquence. Bernard Awtrey, Villa Rica, Ga., changed. D. Acker, Lincoln, Ala., Progress of Man. J. H. Foster, Tuskegee, Ala., A Life of Pleasure or a Life of Toil. E. Wright, Silver Run, Ala., March of Mind. D. Harrison, Sulphur Spring, Ala., Character and Reputation. J. D. Taylor, Summerville, Ga., Annihilation. C. D. Warnock, Oxford, Ala., The scattered scholar. All these addresses were well acquitted themselves in superb style. At evening the alumni association met in College hall. The new graduates were welcomed in a most delightful and eloquent speech by its worthy president, Mr. James N. Gunnels. The association then listened to an essay by Miss May Oden, after which Mr. E. H. Wright gave an instructive address on the subject of life.

ROME RAMBLINGS.

Special Correspondence of The Constitution.

ROME, June 19.—Colonel Henry D. Capers, of this city, delivered an address on "Inter-State commerce," before the National Dramatic association, at their recent convention in Cincinnati. He was presented with a beautiful and costly gold-headed cane as a token of appreciation. A number of Romans will visit the city during the next month. The new city hall is rapidly nearing completion. It is a fine building. An effort is being made to get up a creditable fourth of July celebration. A meeting of citizens for this purpose will be held this evening. Farmers report that cotton in this section has improved wonderfully within the past two weeks, and the prospect for a good crop is very fine. This week the boy orators will claim a goodly share of attention. Wednesday evening the exhibition of Professor J. M. Proctor's "The Science of Agriculture" will be given. The pupils of Professor Brothwell Graham's school will present "Tom Sawyer" and Friday evening the exhibition of Mr. Graham's school will occur.

WIND AND HAIL IN HEARD COUNTY.

Special Correspondence of The Constitution.

FRANKLIN, June 18.—This evening, about sunset, a terrific storm of wind and hail struck us again. The wind began to blow from the north, and with such fury that the county bridge at this place, just completed at a cost of \$5,000, was swept away and torn in pieces. The hail was large, and the corn and other crops were beaten and blown down, and the wind soon varied around to the south twisting it back in opposite direction. The crops are blacked with fallen trees. Citizens are leaving their homes with rain to spend the night in more comfortable quarters. I hear that some have taken refuge in the court-house. Darkness settled down upon the scene of destruction and leaves it to the imagination to conjecture the extent of the calamity. Wheat and oats were completely destroyed two weeks ago. It is feared that the growing crops are irretrievably ruined, and cotton seriously damaged, by the storm of this evening.

VALDOSTA DEMOCRATS.

Special Correspondence of The Constitution.

VALDOSTA, June 17.—The chairman of the democratic committee of this county, Mr. J. H. Jones, has called a mass meeting to be held on the fourth of July, for the purpose of selecting delegates to the Atlanta convention. Our people, as a rule, are taking very little interest in politics. They will support with satisfaction the nominee of the convention.

On the 15th instant, Mr. S. M. Smith, a prominent merchant of this city, was united in marriage to Miss Besie, eldest daughter of Captain Mitchell Jones, of this county. The attendants were: C. H. Paine and Miss Ada Jones, W. F. Roberts and Miss Susie Smith, R. E. Allen and Miss Lily Stuart, John Ramore and Miss Tom Young.

KNOXVILLE.

ROUND ABOUT A LIVE TENNESSEE TOWN.

Pushing to the Front as a Railroad Center—Manufacture of Cars, Cows, Wholes, Cotton, Iron, Furniture and Iron—The Cumberland Range and its Frontiers—Points.

Special Correspondence of The Constitution.

KNOXVILLE, Tenn., June 17.—Knoxville is as solid as a rock! With this sudden and brief exclamation I am prepared to say some pleasant things about the city. There is probably no city in the south that presents a more substantial appearance every way than Knoxville. To the stranger within her gates she looks small; but this compactness only gives her an air of pretentiousness and thrift when one moves about the streets and gets into the true inwardness of things. Down in Georgia we know comparatively little about Knoxville, and I think I shall make the home people open their eyes at the showing the city makes. Chattanooga has no special affection for Knoxville, and would turn up her nose, probably, at the statement that this town is as large as hers. And so Knoxville is a slobber over Chattanooga, either, and I have met men here who are willing to call the southern Pittsburgh a big blundering machine from Cameron hill to the Staunton house. However, this is none of my business, and I am not here to say anything about away long before they get to be men.

But mark you, this town is a small giant. Commercially she ranks second to Atlanta in the south, excepting Nashville. New Orleans, I mean as a wholesale market. As a manufacturing center, Knoxville is considerably behind Chattanooga, but even at that is holding her own with remarkable energy.

It will be a matter of surprise to many to know that the trade of Knoxville amounts to over \$1,000,000 annually. It is true, new enterprises, like the iron and steel works, are not yet started, but they will pass away long before they get to be men.

DAHLONEGA'S MINES AND MEN.

Special Correspondence of The Constitution.

DAHLONEGA, June 15.—Dr. Mell delivered a good sermon on Sunday to a large congregation at college hall and conferred the degree of B.A. on five young men last night, graduates of North Georgia college, at the close of the commencement exercises, which have been quite interesting all through.

Colonel Jacob Dick died on last Sunday and was buried Tuesday with Masonic services, followed to the grave by a very large party of friends.

The new bridge across the Chestatee river, at the location of the Calhoun forty-stamp gold mill, is up and ready to pass travelers over, and will be a great convenience.

From the Dahlonega mining signal. The fish trap flume-line, running to the ore deposits, is about finished, and would have been long since completed had the lumber, but on account of such a demand from every quarter it is impossible for all to be supplied as fast as they would like. When the lumber gets in the mill will, in a very short time, be ready for action.

The Barlow mill regularly takes the yield is about the same from month to month, depending entirely on the amount of ore put through.

The tail race of the mine is showing up well, and the yield is satisfactory.

The work towards getting ready for action on the Pigeon foot is progressing slowly, but surely.

Mr. Hall is exerting every energy to get the Calhoun mill completed at an early date, and if the work goes on as rapidly as at present, the company will soon be able to report their weekly clean-up.

The East cut is now something over 80 feet deep and from 80 to 125 feet in width, and near 300 feet in length. The canal is being pushed very rapidly, and a section of 20 feet is finished and ready for operation.

The last night the Dahlonega mill was in full operation, and the work of repairing is going on.

The Dahlonega mill is also complete and will be put to work soon.

The Singleton yield is satisfactory and everything is looking up very much.

The Columbia plants are looking exceedingly well, and the general outlook is good. The flume line to the second level is not yet completed, but will be in a very short time.

GRiffin GOSSIP.

Commencement Exercises—Production of an Original Drama by a Griffin Lady.

Special Correspondence of The Constitution.

GRiffin, June 19.—Rev. J. D. Hamilton, a talented and eloquent divine of Athens, Ga., preached the annual commencement sermon of the Griffin female college last Sunday. The sermon was fine, and the choir sang some of the best music of the day.

The choir of the consolidated membership of the various churches of the city, aided by the members of the Philharmonic society. When the full chorus of the choir sang, the music was in harmony with the soul-stirring tones of the huge organ, which adorned the gallery of the church.

It is not the effect was grand and doubly added to these interesting exercises. Tuesday night the regular annual commencement exercises of the female college will take place at the Samuel Bailey male institute.

The chapel of this institute is the most pleasant and commodious in the city, and has a seating capacity of between 1,500 and 2,000 people. A fine programme has been arranged and will be presented, consisting principally of music, conferring of degrees and other new and most entertaining and interesting features. Wednesday night the full chorus of the choir sang, the music was in harmony with the soul-stirring tones of the huge organ, which adorned the gallery of the church.

Wednesday night the full chorus of the choir sang, the music was in harmony with the soul-stirring tones of the huge organ, which adorned the gallery of the church.

It is not the effect was grand and doubly added to these interesting exercises. Tuesday night the regular annual commencement exercises of the female college will take place at the Samuel Bailey male institute.

The chapel of this institute is the most pleasant and commodious in the city, and has a seating capacity of between 1,500 and 2,000 people. A fine programme has been arranged and will be presented, consisting principally of music, conferring of degrees and other new and most entertaining and interesting features. Wednesday night the full chorus of the choir sang, the music was in harmony with the soul-stirring tones of the huge organ, which adorned the gallery of the church.

THE COTTON MARKET

CONSTITUTION OFFICE.

Atlanta, June 19, 1882.

New York.—The cotton market opened quiet

this morning at lower prices and continued during

the morning without much change. At noon the early

months were asked some 3 1/2 points, and after

wards moved a fraction higher. Subsequently the

market relaxed and developed dullness, followed by

a slight decline. At the close futures were barely

steady, the early months showing a gain of 1/4

points a day later showing no quotable change. The

spot market remains about the same with mid-

dling 12 1/2.

Net receipts for two days 3,300 bales, against

7,300 bales last year; exports 20,274 bales; last year

11,785 bales; stock 373,375 bales; last year 371,421

bales.

Below we give the opening and closing quotations

of cotton futures to-day:
